HOWELL METAL

COMMITTED TO QUALITY

Howell Metal manufactures copper water tubes, and air conditioning and refrigeration tubing in straight lengths and coils. Its products are used in underground water services, water distribution systems, chilled water mains, drainage and vent systems, radiant panel and hydronic heating, solar heating, fuel oil and natural gas, nonflammable medical gas systems, air-conditioning and refrigeration systems, ground source heat pump, and fire sprinkler systems applications. The company was founded in 1966 and is headquartered in New Market, Virginia.
